**A3 COLOUR MFPs THAT
ARE ADAPTABLE TO YOUR
FUTURE NEEDS**

**When you invest in technology you're planning for growth
/This is Why our MFPs adapt to meet your needs.**

There are always new challenges to overcome /This is Why our MFPs are fit for the future.

When it comes to office equipment, you're not just buying for today, you're investing in the future – preparing to meet new (perhaps unexpected) challenges. That's why, with their broad range of options and upgrades, our versatile A3 colour MFPs are a great choice now and in the years ahead.

There are five cloud-capable models to choose from: the high performance MX-6050N and MX-5050N, which print and copy at an impressive 60 and 50 pages per minute (ppm), our mid-range 40 and 35 ppm MX-4050N and MX-3550N or, the 30 ppm MX-3050N for smaller workgroups.

ESSENTIAL FEATURES AND EXTRA VALUE OPTIONS

All the essentials as standard...

Every essential feature is included as standard and everything can be controlled from a large 10.1" colour LCD touchscreen, which tilts for easy viewing and gives you intuitive access to every function. It will even recommend the most environmentally-friendly setting for each task.

In addition, each user can customise the screen which supports multi-touch gestures for easily previewing and editing copy and scan jobs.

Scanning is fast and intuitive and you can scan mixed batches of colour and black & white documents automatically, even if they are of different sizes and weights.

Paper drawers accommodate up to SRA3 media and weights up to 300 g/m², for maximum versatility. And as no one likes interruptions you'll be reassured to know that you can even top up the toner* and paper supplies without pausing the print / copy run.

...with all these extra-value options to choose from

These new MFPs really are designed to adapt to your needs. Options include:

- A wide range of finishing solutions including saddle-stitching, manual and stapleless stapling
- Single Sign-On capability for rapid access to popular cloud services
- Sharp OSA (Open Systems Architecture) for integration with network and cloud-based applications
- A range of Optimised Software Solutions for easier and more productive scanning, printing and mobile connectivity
- Compact PDF capability for scanning into convenient file sizes
- Adobe® PostScript® 3™ for enhanced graphics processing
- Fax expansion
- Job Separator Tray to prevent copy, print and fax jobs from getting mixed up

*MX-6050N & MX-5050N only

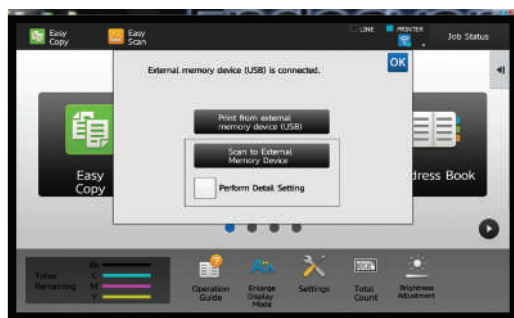

High quality. High productivity.

Time is often limited /This is Why our MFPs are designed to do so much more.

These versatile MFPs can act as print servers to give you 'Pull Printing' capability. This means that you can send a print job to your chosen device or use 'Print Release' to print your documents from another networked MFP, in the same range, at a time and location that's convenient to you.

Not only does that give you the flexibility of collecting your output when you want but it also protects against sensitive documents being left out in the open.

COLLECT JOBS AT
ANY NETWORKED MFP

If you have Microsoft Office files on a USB memory stick you can simply plug into the MFP, select your files and start printing*. Scanning to the memory stick, or to the cloud or for immediate output, is just as easy.

SIMPLY PLUG YOUR USB MEMORY STICK
INTO THE MFP AND START PRINTING

Our unique auto process control and developer refresh system work together to deliver page after page of consistently superior quality, and the Auto Colour Mode lets you scan and copy colour documents without the need to fine-tune any settings.

There's nothing complex, just consistently high quality from mixed content originals.

SUPERB IMAGE QUALITY

*Optional MX-PU10 required to print Microsoft Office files.

No one wants to read the manual /This is Why our MFPs make office life easier, for everyone.

It's important to invest in technology that's easy to use, with the minimum of intervention, so it's good to know that every major feature can be accessed from a highly customisable 10.1" colour LCD touchscreen. We've even added integrated web browsing.

There's nothing to learn and even the most advanced controls can be mastered in moments.

Advanced Functionality

We're all used to accessing data and documents from our phones, tablets and notebooks. But now you can print from them, too. Simply add the wireless LAN and Postscript options and use Sharpdesk Mobile to print from your mobile device, or use any App that supports Google Cloud Print or the Android printing framework (Sharp Print Service Plugin). Plus, we've added yet another connectivity breakthrough for making life easier for mobile workers: AirPrint technology broadcasts a signal to iPhone, iPad, and Mac environments, so the user knows that a nearby MFP is available.

We've added a Single Sign-On capability, too. That means that your team members can sign on at the control panel for immediate access to their favourite cloud applications and storage services, including Google Drive™, OneDrive® and SharePoint® Online, without having to re-enter their log in details. Printing directly from the cloud and scanning documents from the MFP up to the cloud has never been easier. And mail service connectors conveniently send scanned data directly to recipients in your Gmail™ or Microsoft Exchange account.

Tough security

Sharp MFPs come with robust security features, such as the encryption and secure erasure of data on the hard disk (automatically as well as on-demand), password controlled access for routine user authentication and a useful Data Initialisation feature to erase data from your MFP when the time comes to replace it.

For even greater security, a third party card reader adds tighter access control, and a secure network interface, SSL, IPsec and port-based network protection defend against the most determined attacks. We even help you prevent the unauthorised copying, scanning, faxing and filing of confidential documents, with our Document Control Function*.

We guard against accidents too, with features such as password-protected PDFs, a Hidden Pattern Print feature which can reveal a watermark and Confidential PIN Printing which requires the user to be present at the MFP before printing begins.

All this, plus S/MIME for secure email communications, advanced data protection and high security logins and user authentication.

Energy efficient

Low melt toner, configurable and automatic power on/off settings, Eco Scan and a shorter warm up time are just some of the many features that ensure extremely low energy consumption.

In addition, the control panel display will prompt users to select the most environmentally friendly option before starting a job and the toner cartridge automatically ejects only when the toner has been fully exhausted, eliminating waste.

DRAG & DROP ICONS TO
CUSTOMISE THE HOME SCREEN

* Requires optional Data Security Kit.

Busy managers optimise productivity /This is Why Sharp optimises workflows.

These next generation printers will transform the productivity of any workgroup. Your whole team will find that printing, copying, scanning and finishing documents is fast, easy and efficient. But that's just the start.

There's a full range of extra-value options and upgrades to choose from, too. For example, if you couple one of these next-generation MFPs with Cloud Portal Office and one or more of our Optimised Software Solutions, you'll see productivity elevated right across the workgroup.

Cloud Portal Office

Cloud Portal Office is our award-winning business-class collaboration service which connects phones, tablets, PCs, Sharp MFPs and our BIG PAD interactive whiteboards together in a single, seamless information environment.

In other words, everyone gets on-demand, walk-up access to every document that's stored in the cloud. You can also scan automatically indexed documents directly to a folder in the cloud, and send email alerts to colleagues who need them, all from the MFP.

Optimised Software Solutions

We've created our range of Optimised Software Solutions to help you reduce costs, increase efficiency and improve security. Do more with your new Sharp MFP and boost your productivity by adding one or more of these optional solutions:

Our **Optimised Printing Solutions** help you monitor and manage your print and copy usage, so you can eliminate unauthorised use, track and recover costs and reduce waste.

Our **Optimised Scanning Solutions** save time and prevent costly errors by simplifying and automating the capture, storage and sharing of documents, regardless of their format or purpose.

Our **Optimised Mobile Solutions** help people to connect tablets, phones and laptops simply and securely, so they're always in touch.

Our **Optimised Workflow Solutions** help reduce costs and streamline repetitive tasks, restoring the business productivity you need to achieve and maintain profitable growth.
