

HOW DO PLASMACLUSTERS WORK?

TRIPLE FILTRATION SYSTEM

1. PRE-FILTER

Absorbs dust and harmful particles

Pre-Filter

2. ODOUR FILTER

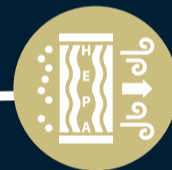

Absorbs unpleasant odours, like cigarette smoke or other common homemade odours

Odour Filter

3. HEPA FILTER

Removes 99.97% particulate matter incl. pollen, allergens, viruses, mould and bacteria (incl. PM10, PM2.5)

HEPA Filter

AIR HUMIDIFICATION SYSTEM

- Special system delivering clean and hygienic evaporation humidifying
- Water molecules are minimal that they do not carry dangerous particles
- Automatically adjust the level of humidity, depending on the room temperature
- Eliminates pathogenic dry indoor air
- The right humidity prevents the throat and eyes from drying
- Improves indoor climate
- Moisturises the skin and keeps it healthy!
